PROFESSIONAL SUMMARY

Entry-level **Full-Stack Developer** and Computer Engineering student with hands-on experience building responsive web applications using **React.js**, **Next.js**, **TypeScript**, and **Tailwind CSS** for the frontend and **Node.js**, **Express.js**, and **MongoDB** for the backend. Skilled in **RESTful API** development, **JWT authentication**, role-based access control, and scalable application architecture. Developing expertise in **AI-powered automation**, including building AI agents with **n8n** and applying **LLMs** to streamline workflows. Proficient in **Git and GitHub**, **Docker**, and **CI/CD pipelines**, with a strong focus on clean UI/UX design, performance optimization, and production-ready software.

EXPERIENCE

Software Engineer - Job Simulation | Y Combinator / Forage *Sep 2026*

- Gained hands-on experience in **full-stack development**, feature delivery, debugging, and product analytics.
- Optimized dashboard rendering and state updates, improving **UI responsiveness by 20-30%** for a smoother user experience.
- Applied **problem-solving**, clean code practices, and **Git** workflows to ship features and fix bugs in a startup-style project.

PROJECTS

Mess Management System | GitHub *May 2026*

- Developed a full-stack mess management platform using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) with dedicated Admin and Student panels to streamline meal planning, attendance tracking, and student record management.
- Implemented secure **JWT authentication**, **bcrypt** password hashing, and **role-based access control (RBAC)** to protect application routes and APIs.
- Designed an admin dashboard to manage daily lunch and dinner menus and monitor attendance, giving students real-time visibility into schedules and attendance history.

E-commerce Website | Live Demo *Aug 2025*

- Engineered a full-stack **e-commerce platform** with product catalog browsing, cart management, order processing, and **role-based access control** for Admin and Customer users.
- Built a **RESTful API** backend with **Express.js**, **MongoDB**, and **PostgreSQL**, paired with a responsive, mobile-first **React.js** and **Next.js** frontend using **TypeScript**, **Redux**, **Tailwind CSS**, and **Bootstrap**; prototyped the UI with Stitch AI.

News with API | Live Demo *Oct 2024*

- Built a responsive news aggregator with category-based filtering and **client-side routing**, fetching real-time articles from a third-party **News API** for smooth browsing across devices.
- Implemented centralized **state management** and optimized API calls to ensure fast load times and a seamless reading experience.
- Integrated **search** and **pagination** features to help users quickly discover and browse relevant articles.
- Deployed the application on **Vercel** with an optimized build configuration for reliable, high-performance delivery.

Image Discovery & Search Application | Live Demo *Dec 2023*

- Built a dynamic photo-discovery app integrating the **Unsplash API**, with optimized API calls and navigation for a fast, responsive browsing experience.
- Implemented **keyword-based image search** and a **responsive grid layout** with **lazy loading** for smooth, high-resolution browsing.
- Designed a **mobile-first, responsive UI** with **infinite scroll** to deliver a seamless image-browsing experience across devices.
- Deployed the application on **Vercel** with optimized asset loading for fast page rendering and improved performance.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, Axios, Fetch API, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), bcrypt

Databases: MySQL, MongoDB, PostgreSQL

AI & Automation: LLM APIs, Prompt Engineering, Multi-Tool AI Agent Development, Workflow Automation (n8n)

DevOps & Tools: Git, GitHub, VS Code, Docker, CI/CD Pipelines, Postman, Vercel, Claude Code, Codex, Google Antigravity

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering *Feb 2023 - Present*

Sandip Institute of Technology and Research Center (SITRC) | ***CGPA: 7.50***

CERTIFICATIONS

Software Engineering Job Simulation - Y Combinator (Forage) *Sep 2026*

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate *Sep 2025*

Basics of Data Structures and Algorithms (DSA) - Simplilearn *Feb 2025*

Infosys Responsive Web Development *Aug 2024*

LANGUAGES & INTERESTS

Languages: English, Hindi, Marathi | **Interests:** Cricket, Gaming, Photography
